PROFILE

3rd-year Information Technology undergraduate at UIET, Panjab University with hands-on experience building and deploying full-stack web applications using FastAPI, PostgreSQL and MongoDB. Completed two backend engineering internships, shipping 10+ production REST API endpoints and real-time chat features. Passionate about clean, scalable code and eager to contribute as a fresher/intern in a fast-paced engineering team.

EDUCATION

B.E. in Information Technology 2023 – 2027

University Institute of Engineering and Technology, Panjab University · CGPA: 7.2 / 10.0

Class XII – CBSE 2022

Star Plus Convent School, Raman Mandi · 85%

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, HTML, CSS, SQL

Frameworks: FastAPI, Flask, React.js

Databases: PostgreSQL (PgAdmin), SQLAlchemy ORM, MongoDB

Tools: Git, GitHub, Docker, Postman, Render, JWT / OAuth2

Libraries: NumPy, Pandas, Pydantic, Recharts

EXPERIENCE

Backend Development Intern · Destm Technologies Jun 2026 – Jul 2026

- Contributed to a web-based chat application, building REST APIs with Python/FastAPI and one-to-one and group chat features on a React.js, JavaScript, and React Router front end.
- Implemented JWT-based authentication and worked hands-on with MongoDB for data storage and management across the application.
- Worked under a senior full-stack developer across both backend and frontend tasks, maintaining consistent code quality and responsibility on all assigned work.

Software Developer Intern · Prodigy InfoTech Jul 2025 – Aug 2025

- Designed and shipped 10+ production REST API endpoints in Python (FastAPI/Flask), improving data retrieval response times and enabling new front-end features.
- Integrated JWT-based authentication across multiple endpoints, ensuring secure, role-scoped access to protected resources.
- Collaborated in an agile team of 5 engineers — participated in daily stand-ups, code reviews, and bi-weekly sprint planning using Git branching workflows.

PROJECTS

Stride – Project Management Platform · React · FastAPI · PostgreSQL · WebSockets · Docker · [Stride](#)

- Built and deployed a full-stack platform supporting multi-user workspaces, real-time team collaboration via WebSockets, and a live KPI dashboard tracking task completion rates, deadlines, and team velocity.
- Implemented role-based access control (RBAC) with Admin, Manager, and Member tiers; automated email notifications for task assignments and status updates using FastAPI background tasks.
- Designed a normalised PostgreSQL schema covering users, workspaces, projects, tasks, and chat messages; secured end-to-end with JWT authentication and deployed via Docker on Render.

Stock Trading Simulator · React · TypeScript · FastAPI · PostgreSQL · Recharts · [GitHub](#)

- Built a full-stack paper-trading platform allowing users to buy/sell stocks with a virtual wallet, view portfolio P&L in real time, and track trade history — all backed by a RESTful FastAPI and PostgreSQL.
- Integrated live market data visualisation with Recharts (candlestick + line charts with configurable timeframes); used SQLAlchemy ORM and Pydantic for data modelling and request validation.
- Implemented JWT authentication with refresh token rotation, protected routes on the React front-end, and TypeScript interfaces throughout for type-safe API communication.

ACHIEVEMENTS & ACTIVITIES

- Smart India Hackathon (Internal Round), Sept 2024 — Backend Developer responsible for API design and PostgreSQL schema; built and integrated 3 core endpoints within a 24-hour window.
- Solved 150+ DSA problems on LeetCode, HackerRank, and GeeksforGeeks, with strong focus on arrays, trees, graphs, and dynamic programming.
- Maintains well-documented GitHub repositories for all major projects — structured READMEs, setup guides, and changelogs following open-source contribution best practices.
